

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re application of:

BEDNARIK *et al.*

Appl. No. 08/917,710

Filed: August 26, 1997

For: **Soluble Interleukin-1 Receptor**
Accessory Molecule

Art Unit: 1646

Examiner: Draper, G.

Atty. Docket: 1488.0450001

#10

Statement Concerning the Deposited cDNA Clone

Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

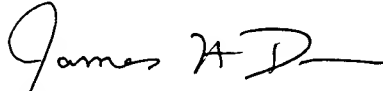

Plasmid 1450621 containing human cDNA encoding a soluble Interleukin Receptor Accessory Molecule polypeptide was deposited under the terms of the Budapest Treaty on July 25, 1996 at the American Type Culture Collection, Patent Depository, 10801 University Boulevard, Manassas, VA 20110-2209, and given accession number 97666.

Assurance is hereby given that: (1) all restrictions on the availability to the public of the deposited plasmid will be irrevocably removed upon the granting of a patent; (2) the plasmid has been deposited under conditions such that access to the material will be available during the pendency of the patent application to one determined by the Commissioner; and (3) the deposit will be maintained with all of the care necessary to keep them viable and uncontaminated for a period of at least five years after the most recent request for the furnishing of a sample of the deposited microorganism, and in any case, for a period of at least thirty years after the date of deposit or for the enforceable life of the patent, whichever period is longer.

I have read and understand 37 C.F.R. § 10.18(b).

Respectfully submitted,

HUMAN GENOME SCIENCES, INC.
